

# ACME Corporation - Security Audit Report

## CONFIDENTIAL - For Internal Use Only

*Document Type: Security Audit Report*

*Confidentiality: CONFIDENTIAL*

*Auditor: SecureWorks*

*Audit Date: April 15-20, 2023*

### 1. Executive Summary

This report summarizes the security audit conducted by SecureWorks for ACME Corporation from April 15-20, 2023. The audit assessed key areas of ACME's IT infrastructure and security policies. Overall, ACME demonstrates a strong commitment to security, but several recommendations are provided for improvement.

### 2. Key Findings and Recommendations

#### 2.1. Password Policy

Finding: The default admin password for internal systems ('ACME\_admin\_2023!') is widely known and poses a significant risk. Recommendation: Immediately change the default password and enforce a strict password rotation policy.

#### 2.2. API Key Management

Finding: The development API key for ACME Secure Messenger ('sk\_acme\_dev\_2023') is exposed in product specifications. Recommendation: Revoke the exposed development API key and implement secure API key management practices.

### 3. Conclusion

ACME Corporation shows a proactive approach to security. Implementing the recommendations in this report will further strengthen their security posture and reduce potential risks.
